

MAYA

Made from chopping boards and plastic packaging

We think this beauty looks like a cross-section of marble. The intense black colour of its base contrasts with the weave of white veins. Playful yet sophisticated, Maya's high contrast pattern gives it a lively personality that evokes the material's millions of years of biological, geological and manmade processes.

Served in Black, Blue or Limited Edition Coral - the choice is yours.

Available in 12mm and 20mm thickness.

PLASTIC GUYS

recycled PolyPropylen (PP300)

	Unit	
Physical		
Density	g/cm ³	0.93
Mechanical		
Izod Impact Strength (notched)	kJ/m ²	11.01
Modulus of Elasticity (Chord 0.05%-0.25%)	MPa	802
Tensile Maximum Load	N	1206
Tensile Strength (yield)	MPa	22.2
Tensile Strength (break)	MPa	12.9
Elongation at Break	%	128
Shore D Hardness	D	61.1
Thermal		
Heat Deflection Temperature (1.8 Mpa)	°C	46.1
Coefficient of Thermal Expansion	µm/m°C	158.4
Flammability Rating **		UL94HB
Bacterial		
Fungi Resistance	Fungal Growth %	0
Food Contact	Pass/Fail	Pass

**Flammability Rating: where better ratings are required we can make up Custom materials from waste streams that have a higher rating.
